## CAT ADOPTION PROCESS

- Once you complete your application form, a member of the cat staff will come and talk to you about your application.
- There may be a range of factors in the household that would influence what kind of cat we could rehome to you (e.g. young children who would be scared of a boisterous cat, a dog with no cat experience).
- You are more than welcome to take a look at the cats, but you may not be able to make any specific bookings at this point, depending upon what cats are available.
- You must first have your vet check (if applicable); landlord check (if applicable) and a home advisor will be assigned to assess your home and the area it is in. Once these checks are completed you will be advised of what cats we have that are suitable for your home based upon the above criteria.
- **Depending upon the outcome, a housecat may be suggested. We will provide our housecat leaflet if you wish to read in the meantime.**

### The next stage:

- Once we have the results of the checks, a staff member will contact you with options of which cat/s have been approved, and you can look at them further online.
- Your approved form will be left for collection in the cat unit.
- Should you wish to choose one of the cat options available to you, you will be invited to come and collect your approved form, which should have your list of approved cats written on it so that any staff member can show them to you.
- You can then choose your cat/s (all the family must come to meet the cat) and you will be invited to either collect within 24/48 hours (you can also collect later in the week if more suitable for you), or at a set later date if medication needs to be ordered. (this could take 2/3 days depending on when you want to collect the cat as an appointment may be necessary with our vet to sign the cats medication over to you)
- If for any reason we do not have a suitable cat for you, but think we may do in the future, your form will be held for 3 months in the hope that a suitable cat becomes available.

IF YOU ARE NO LONGER ABLE TO CARE FOR IT ASSISI WILL RECLAIM OWNERSHIP OF THE CAT  
A SPACE MAY NOT BE AVAILABLE ON THE DAY YOU CONTACT US BUT ANY EX-ASSISI ANIMALS  
WILL BE A PRIORITY FOR RETURN SPACE AS SOON AS ONE BECOMES AVAILABLE.

# ADVICE ON HELPING YOU AND YOUR CAT SETTLE IN TOGETHER

## What you will need

Make sure your kitten has a warm and comfortable bed and perhaps a small cuddly toy. An adult cat also needs a warm, secure bed to retreat to when tired. Have a litter tray in the same room as the bed.

## Bringing the cat/kitten home

**The cat/kitten will need a quiet, separate area to acclimatise to the household. This could take several days.**

- When you bring a new cat/kitten into your home remember that it will be scared and may run under the furniture or behind a seat. Do not force it out as this will terrify it even more. Just talk softly to it and be patient. It will come out of its own accord.
- After a period of a few hours leave some food out.
- Have a litter tray nearby
- The noises associated with your home eg television, washing machine, vacuum cleaner etc, will be alien to their sensitive hearing so be sensitive to them.
- Showing patience and understanding at the beginning will be rewarded by a pet that is confident in the love and protection of a new family.

## Feeding/Litter trays

- Feed kittens 3 times per day. Adult cats should be fed twice daily.
- Give a clean dish at each meal and have fresh water always available.
- Cats and kittens at the Sanctuary are not given milk and are used to water. We do not advise you give the cat/kitten milk. **All cats/kittens cannot digest milk and it is not essential for their diet. Fresh water is.**
- Have a litter tray easily accessible to the cat/kitten, but not close to its food. The cat/kitten will do its best to use the litter tray, but needs to know where to find it.
- Do not hit the cat/kitten if an accident happens as it will not understand why it is being punished and love and confidence will be replaced by fear and uncertainty. Remember the cat/kitten is still learning.
- Check for reasons that prevented the cat/kitten using the litter tray. An example might be accessibility i.e. the door to the room where the litter tray was positioned was closed. Another could be that the tray was already soiled.

## Safety in the home

- A cat/kitten in a new home will want to explore. You must protect it from danger e.g. open fires, electric cables, chimneys, hot plates on cooker, washing machines, tumble dryers, plastic bags, sewing threads (which can be swallowed and cause twisting in the intestine) etc. All these hazards could result in a fatality, so it is your responsibility to make sure that your pet is kept free from harm.
- Watch where you walk when you have a kitten. If you accidentally stood on it you could crush its fragile body.
- Make sure the toilet seat is down and never let a cat/kitten into the bathroom when you are running a bath as it could jump in the water and get badly scalded.

## Settling in period.

- Remember to give an adult cat time to settle in (weeks, not hours or days). The cat may have been previously abandoned or lost from a loving home. It is a strange new world and the cat needs time to adjust.
- The cat may not be used to children who are continually trying to play with it or grab at it so may get frightened and strike out. If you have children make sure they respect the cat's space.

- If you are introducing a cat/kitten into a household which already has a resident pet, always take time to introduce them gradually. Ideally let your new cat have one room and the resident pet the rest of the house for a few days.
- Let your resident pet come into limited contact with the new arrival and gradually build up the access period each day. If your resident pet does not feel threatened by the new arrival, it increases the chances of friendship between them. The last thing you want is for your original pet to feel threatened. This will result in fighting and marking of territory or, worse still, bullying which could cause either of the animals to leave home.

### **Letting the cat out**

**If you have adopted a housecat, they are indoor only and are not to be let outside.**

**We do not advocate taking a housecat out on a lead.**

- After a minimum of eight weeks for an adult cat, (**6 months for a kitten**) you may let the cat out for a short supervised time. This is best done prior to a meal. A hungry cat is less likely to stray.
- Always have the cat in before nightfall, a more dangerous time for cats.
- When fitting a collar, make sure it is not too tight; you should be able to put your finger between the collar and the cat's neck. Check a growing kitten's collar weekly and ALWAYS USE A QUICK RELEASE COLLAR.
- Patience has its rewards and with time to adjust, the rewards will be great – a contented loving cat and a happy family.

**If you have a problem contact the Sanctuary (028 9181 2622) we will be pleased to help in any way.**

**If you are worried about your cat's health, contact your vet for advice.**

The following food is normal diet for Assisi Adult Cats:

- Royal Canin Adult Dry
- Whiskas/ Felix various flavours in jelly or gravy
- Whiskas/ Felix Pouches
- Tuna/ Chicken as a treat or giving medication.
- Water available at all times.
- Feed as advised
- Leave a small bowl of dry food available during the day

Other necessary items are -

- Litter tray
- Litter scoop
- Litter
- Scratch post. If a house cat then invest in good quality one, essentially tall, different levels and hiding places.
- Three bowls, one each for wet food, dry food and water.
- Distance toys (dangly things on a stick). Not toys that will encourage hands getting scratched or bitten in play.
